

The Lunar and Planetary Institute Presents

# COSMIC EXPLORATIONS: A SPEAKER SERIES

September 18, 2014

## GRAVITY

Alfonso Cuarón's 2013 film "Gravity" wowed audiences and critics around the world with its cinematography and visual effects, and earned kudos from space flight veterans for capturing the look and feel of working in orbit. But the movie is a drama, not a documentary, and it leaves many viewers wondering where the science ends and the art begins. Please join Space Shuttle astronaut and spacewalker Dr. Stanley Love for a gentle but firm deconstruction of the most talked-about space film in recent memory, and find out how to draw the line between fact and fantasy. This presentation kicks-off the 2014–2015 Cosmic Explorations Speaker Series — “Science” on the Silver Screen.

Registration to attend this event is required.

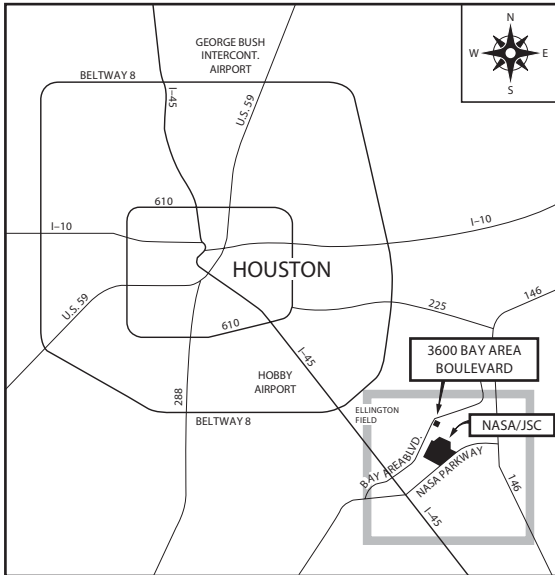

Visit <http://www.lpi.usra.edu/education/lectures> to register for this event.

Seating is limited to 250.

This FREE presentation at 7:30 p.m. is intended for inquisitive adults and will be followed by a light reception and an opportunity to meet Dr. Love.

Speaker presentation held at  
USRA's Lunar and Planetary Institute  
3600 Bay Area Boulevard, Houston TX  
(entrance on Middlebrook Drive)
