Houston Museum of Natural Science Distinguished Lecture Series

Lunar Exploration, a Captivating Science

Dr. David Kring – May 24, 2016, 6:30pm

Threat of Impact: Update

Dr. David Kring – June 30, 2016, 6:30pm

Both presentations will take place at the Houston Museum of Natural Science; 5555 Hermann Park Drive.

For tickets, visit www.hmns.org/education/adults/distinguished-lectures

Dr. David Kring is a Senior Staff Scientist at the Lunar and Planetary Institute in Houston. Dr. Kring's research explores the origin of the solar nebula and its evolution into a geologically active planetary system. Dr. Kring is the Principal Investigator of the Center for Lunar Science and Exploration, a member of the NASA Solar System Exploration Research Virtual Institute.
